

Automatic machine to make « self-cleaning » wire screens

Sample with PU strips

Floor space required : W=4500 mm L=2400 mm H=2700 mm

Extruder for PU granules

Characteristics :	maxi width set-up / PU strip lengths	2000 mm
	Maxi wire diameter	3.5 mm
	Maxi mesh size	indifferent
	Strip widths (standard)	25 or 30 mm
	Nature of crimped wires (including SST, copper, etc)	indifferent
	Maxi PU strip spacing	350 mm (standard)

Important: This machine requires a dessiccator (not shown) to remove humidity from the PU (polyurethane) granules before entering into the extruder.
